

WASHER PUMP KIT WITH KNOB

Triumph TR4-4A

Part Number: **609173**

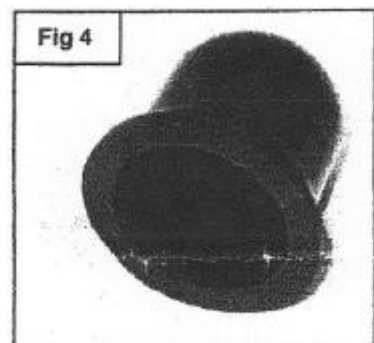

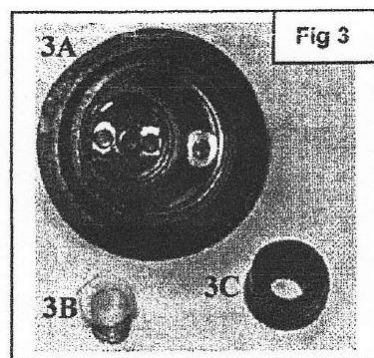

CONTENTS OF HARDWARE:

- x2 2A LOCKING NUTS (to adjust the depth of the spacer 2B & lock it in place)
- x1 2B CAST BRASS SPACER (provides room for knob when pushed)
- x1 2C CHROME BEZEL OR TRIM RING (threads into the brass spacer)
- x1 2D Knob (threads onto the shaft of the pump)

DESCRIPTION

The windshield washer pumps in British cars come in a variety of shapes and sizes. Some, like the TR4 & 4A, had a black plastic base with two plastic nipples, one inlet and one outlet. Others, like the MGA or Austin Healey, had pumps with one inlet and two outlets. The hardware included with the pump is complete and correct for the TR4-4A (Fig 3). It is too bad you can't see the inside of this pump. There are some bits that make this a true quality reproduction. Unlike the later OE pump and many others, this one incorporates a one-way valve (3B) that sits in a housing (3C) in the bottom of the pump body (3A). This makes the pump twice as effective at pumping washer fluid through the tubing as a pump without the valve.

When you push on the knob, you are collapsing a dome-shaped rubber diaphragm (Fig 4), just like the original pump. The material has been tested with off-the-shelf commercial washer fluid to ensure compatibility, and the material is thick enough to provide years of service.

QUALITY PARTS AND ACCESSORIES

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln LN4 2NA, England
