

SISA DESIGN WINDSTOP

Patented / TÜV tested

FITTING INSTRUCTIONS FOR: TRIUMPH TR 3-4-5-6

The windstop consists of the following parts:

1. Shield (polycarbonate) with frame and skirt;
2. Left and right fastening brackets;
3. Insert-plate;
4. Strap with Tenax;
5. Securing pin;
6. Storage bag.

FITTING:

- Open the hood.
- Push the fastening brackets (2) on the right and left side in the groove onto the frame (1).
- Remove the pin that attached the hoodframe (on the right and left side) and fit the insert-plate on the frame and attach both with the same pins.
- Push the windstop (frame with shield and skirt (1)) with the other side of the fasteners (2) into the insert-plates (3)
- Press the brackets (2) firmly down, pull down the straps and mark the positions for securing pins (5).
- Using a 2.5 mm drill, drill a hole on both sides for the securing pins and fasten the pins into the holes.
- Attach the strap to the pins by means of the tenax.
- When the hood is closed, the windstop can stay in the car.
- Remove the foil from the shield.
- If you dismount the windstop, you can use the storage bag (6).
- Start enjoying your convertible more than you have ever done!

Note: always use wet cloth to clean the shield!
